```
library(ProjectTemplate)
```

```
## Loading required package: digest
```

```
## Loading required package: tibble
```

```
load.project()
```

```
## Project name: FutureLearn_Assessment
```

```
## Loading project configuration
```

```
## Autoloading helper functions
```

```
## Running helper script: globals.R
```

```
## Running helper script: helpers.R
```

```
## Autoloading data
```

```
## Munging data
```

```
## Running preprocessing script: 01-A.R
```

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   : 2.00
##  1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##  Mean   :15.4    Mean   : 42.98
##  3rd Qu.:19.0    3rd Qu.: 56.00
##  Max.   :25.0    Max.   :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
